

JICA Project for Improving Continuum of Care with a Focus on Intra partum and Neonatal Care in Cambodia

Project purpose: Neonatal mortality is reduced in target provinces

Expected outcomes:

1. Training and instructions regarding delivery and neonatal care are strengthened;
2. Treatment and care of sick, premature and low birth weight newborns are improved;
3. Follow-up of high risk and low birth weight newborns is strengthened;
4. Health system components necessary to improve continuum of care are strengthened; and
5. Lessons learned are reflected to national policy, strategy and guidelines.
