

JICA Senegal Project to Strengthen Maternal and Neonatal Healthcare Phase2

Expected outcomes :

- Ministry of Health sets up the national level coordination mechanism to disseminate and expand the PRESSMN model;
- Departments of Health in 14 provinces set up the provincial level coordination mechanism to disseminate and expand the PRESSMN model;
- PRESSMN model is integrated into the national nursing and midwifery training curriculum; and
- The effectiveness of the PRESSMN model is evaluated through a sound research.

Project period : 5 years (Nov 2012~Oct 2017)

Project purpose: Expansion of Project for Reinforcement for Maternal and Newborn Healthcare (PRESSMN: French acronym) model nationwide

Main targets : Pregnant women and newborns
