

JICA Vietnam Project for Strengthening the Clinical Training System for New-Graduate Nurses

Project period : 4 years (May 2016~May 2020)

Project purpose : Clinical training for new-graduate nurses is strengthened in pilot provinces/city taking into consideration the subsequent nationwide expansion.

Project counterpart : Department of Science, Technology and Training, Ministry of Health

Target provinces/city: Hanoi City and Binh Dinh, Dien Bien, Dong Nai and Binh Phuoc provinces

Expected outcomes :

- Competency-based post-graduate standard clinical training (including syllabus and modules) is developed and introduced to the pilot sites;
- Training of the trainers of the competency-based standard clinical training is developed and introduced to the pilot sites;
- Monitoring and auditing of the competency-based standard clinical training are developed and introduced to the pilot sites; and
- A road map of nationwide expansion of the standard clinical training is drawn based on evidences such as baseline/endline surveys of the project.
