

SOIK Corporation

Training project on digital medical equipment and Japanese home visit healthcare service

1. To meet the growing medical needs of the middle class, cost-effective Japanese-style home care expertise can help improve the quality of health care.
2. Knowledge on home care is transferred from Yu-sho-kai, a Japanese company, and prenatal control technology is transferred by specialists from IGPC (NGO). The portable ultrasound essential in antenatal consultations are the hallmark of Lequio Power Technology Corp. The participants are medical personnel from government medical institutions and employees (doctors, nurses) of SOIK sarl.
3. The dissemination of Japanese style home care as private business would promote the Japanese brand in healthcare and sales on Japanese portable medical equipment in Africa

Schedule

- July-September Field study
- August-October Training material preparation
- November-December Training and seminar at Kinshasa
