

Cooperation for Development of Cambodian Rehabilitation specialists in NCDs

- Quality of rehabilitation professionals to do prevention/treatment/intervention on NCDs (respiratory, cardiovascular, women's health and oncology) is issued in Cambodia to achieve UHC by international cooperation through enhancement of health care.
- JPTA started support for development of Physical Therapy curriculum of University of Health Science, Cambodia and development of human resource to serve public interest and build a sustainable system collaborating with Singapore Physiotherapy Association since 2018. Quality of rehabilitation medicine is controlled/enhanced by System of CPD in Japan.
- Aim is to contribute improvement of QOL and health promotion as result of improvement of assessment/treatment skill as rehabilitation profession through progress of this program by networking and collaborating with a professional body and MOH.
