Expert training

School health check and  
policy proposal

- Implementation of technical training for health checkup by medical personnel who can not carry out in the "Plan school health room system" of JICA Grassroots Technical Cooperation Project from March 2017 to March 2020.
- We propose a health policy that allows doctors, dentists and nurses in charge of the Ministry of Health to cooperate with the Ministry of Education to carry out medical examinations at their school.
- Incorporate school health checks in hygiene education and support the development of health teachers in the Teacher Training University and specialists as potential teachers who can teach at the Teacher Training University in the Nursing Unit of the University of Health Science.
