

A Spread of fitting technology for hearing aids & Promotion of Diagnosis Equipment in the Socialist Republic of Vietnam.

- Vietnam has around 1 million hearing-impaired patients. None of the research up till now has verified this number and the condition and degree of hearing loss are not properly examined.
- Video creation and distribution of hearing test equipment and hearing aid fitting technology
Web seminars and videos created in Vietnam regarding the latest information on otolaryngology in Japan will be distributed for a limited time during the project period.
- Our company and medical institutions in Japan will cooperate to educate the main hospitals and affiliated hospitals in Vietnam about the importance of hearing tests and the usefulness of hearing aids, and increase the number of institutions handling them. we aim to spread the number of hearing test devices to 10 units and hearing aids to 1500 units annually in three years.

< Schedule of training >

Until Oct 2021

Preparation

From Sep to Dec 2021
