

## Enhancing the use of computed tomography across Republic of Zambia

- The Program for International Promotion of Japan's Healthcare Technologies and Services achieved satisfied results with UTH. The purpose of this project is to provide extended technical support of CT imaging across Zambia (UTH and Livingstone General Hp)
- In coronavirus crisis, online technical trainings will be provided. After the crisis, in-person lessons for UTH and Livingstone General Hp will be conducted.
- It is expected that radiological technologists at the hospitals will achieve a 90% practice rate of Japanese-style examination procedures.

## &lt;Training Schedule&gt;

In coronavirus crisis

- Online technical training for UTH and Livingstone General Hp

After the crisis

- In-person training for UTH and Livingstone General Hp
